BASIS FOR REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

REJECTION OF CLAIMS ON FORMAL MATTERS

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The narrative format of the claimed method renders the subject matter vague because it is unclear what the essential steps are of the method. Accordingly, positively setting forth the method as a series of steps would overcome the vagueness of the method.

REJECTION OF CLAIMS OVER PRIOR ART

Claims 5 and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by Kirchhoff (5,115,658). See Figure 2-6, first full paragraph of column 3 and the second full paragraph in column 5 for the movable arrangement of the upper and lower rolls and

Art Unit: 3725

where a computer operates the upper roll 15 and the pair of lower rolls 24, 42 so that the sheet material 43 is formed in a "rough forming step" to produce a rough formed pipe as depicted in Figures 3 and 4 and is formed in a "fine forming step" to produce the finished pipe as illustrated in Figure 5 and 6. The fine forming step of Figures 5 and 6 performs a final shaping to produce the finished pipe but does not perform any shaping on the rough formed pipe, which is that part of the pipe defined by end 43a. This is the case since the stop 10 will prevent any shaping of the rough formed pipe. Since the claims set forth no means for recognizing the "hole portions" and tying this to the computer operated machine, Kirchhoff's roll bender is capable of operating on sheet material with holes.

INDICATION OF ALLOWABLE SUBJECT MATTER

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
